### Product description:

The KEEN dispenser is designed to optimize the self-service dispensing process in the back office, meaning structures that do not want to keep the machine in the front office = keep the machine in the dining area.

The KEEN dispenses 4 types of juice in carafes using the same patented mixing system. It uses fruit concentrates in Bagbox (4 kg or 3x7 kg) that can be easily connected and placed directly inside the machine with a quick opening lid. High-quality products to maximize service efficiency and reduce costs.

Automatic cleaning system for less staff effort. Maximum energy efficiency: the dispenser cools the beverage and saves 80% of energy compared to systems that continuously cool. Programmable mixing, simplified installation, safety valve on water inlet. At the end of service, the cooling can be maintained by interrupting the dispensing of beverages.

Provision for connection to the water supply network or tank. Interchangeable product labels.

On request: remote control software for statistics and interventions via WI-FI/Bluetooth.
