## Product description:

Our complete kit is the ideal solution for both individuals and professionals; with this kit you will have everything you need for a quick and easy installation.

Michelangelo is the new dry cooling water dispenser with aluminum casting designed by Savese.

Its compact size and elegant design make it ideal for all types of environments, not just domestic. Its use is easy and intuitive, and its 3 buttons allow for dispensing of 3 different types of water: room temperature, cold natural and cold sparkling.

Thanks to its low energy consumption and use of eco-friendly R290 gas, Michelangelo is the ultimate green water dispenser, respectful of the environment.

We recommend purchasing a WATER BLOCK VALVE (code SV5878) for an anti-flooding system.
