Product description:

Our complete kit is the ideal solution for both individuals and professionals; with this kit you will have everything you need for a quick and easy installation.

Michelangelo is the new dry water system with aluminum fusion designed by SaveSe. Its compact dimensions and elegant design make it ideal for all domestic and non-domestic environments.

Its use is easy and intuitive, and its 3 buttons allow for the dispensing of 3 different types of water: room temperature, natural cold, and cold sparkling water.

Thanks to its low energy consumption and the use of eco-friendly R290 gas, Michelangelo is the ultimate Green water system that respects the environment.
