

3D Prototyping

Model:

ABS

PLA

PETG

NYLON CARBON

Further materials on request

Product price:

€0.00 tax excluded

Product codes:

PS008-05

-- BUY NOW --

Synthetic features:

Turn an idea into a tangible object in no time with our 3D prototyping and printing service. **TECHNOLOGY FDM** (Fused Deposition Modeling) **INCLUDED** - Control and adjustment of the graphic file ? **Contact us for a custom quote**

Product description:

It represents a technology increasingly used in the development and production processes of various types of products.

Thanks to 3D printing, it is possible to create prototypes and models quickly and efficiently, allowing for testing and improving the design and functionality of the product before moving on to mass production.

This process reduces development times and production costs, making 3D prototyping an ideal solution for companies seeking to innovate and remain competitive in the market.
